different colors support HACCP-based safety works

In our 100-year history, we have pursued peace of mind in our daily lives as well as better hygiene.

We offer HACCP-compliant cleaning tools which strongly support food safety management.

The main point of HACCP is the distinction between a cleaning area and a storage area for cleaning tools.

We support this safety work by making cleaning tools in 5 different colors. In addition, these cleaning tools have superior durability and prevent foreign matter contamination and the growth of bacteria.

We hope our products will be utilized to ensure the safety of food in a sanitary environment.

5 color variations enable compliance with HACCP

HACCP is known as the standard for safety management in food manufacturing. This safety method, established by NASA to ensure sanitation of space food, is used not only as an American criterion but also a U.N. criterion today, and has been also introduced into many companies. We developed cleaning tools for supporting the approach to this safety management. To meet the HACCP requirement for the distinction of point of use, application and storage area of cleaning tools, we make cleaning tools in five different colors and support safety management work.

Compliance with the Food Sanitation Act for disclosure of reliable quality information

We can attach SDSs when shipping products. They describe the contained materials, their hazard and toxicity information, handling precautions, environmental impacts, etc., for safe and proper use of chemical products. We can also submit the materials on compliance with the Food Sanitation Act.

About HACCP

In the past, an emphasis has been put on the improvement of the manufacturing environment and securement of sanitation, based on the idea that making the manufacturing environment immaculate and clean enables the manufacturing of safe foods.

And the safety of manufactured foods has been checked mainly through a sampling inspection of finished products (such as microbial culture test).

However, it is impossible to eliminate the possibility that unsafe foods are put on the market and cause food poisoning only by conducting sampling inspection.

On the other hand, the HACCP method enables the prevention of defective products from being shipped in advance, because hazards are predicted in advance in all processes ranging from receipt of raw materials to product manufacturing and shipment, critical control points (CCP) to prevent such hazards (prevent, eliminate and reduce hazards to acceptable levels) are identified, such points are monitored and recorded continuously and countermeasures are taken immediately for resolution if any abnormality is observed, in addition to the above idea and method.

Features of TAKASAGO-series products

1 Made in Japan

The products are designed for Japanese people's physical constitution. As they are light in weight and compact in size, they are also friendly to women and are earning a good reputation.

2 HACCP-compliant

The cleaning tools are made in five different colors to distinguish the point of use, application and storage area of cleaning tools as required by HACCP to support safety management work.

3 Highly durable

The brush body is made of polypropylene, which is robust and hard to break, to reduce foreign matter contamination caused by breakage.

4 Structured to prevent bristles from falling out

The metal catches hold the bristle roots tightly to reduce risk of foreign matter contamination due to bristle loss.

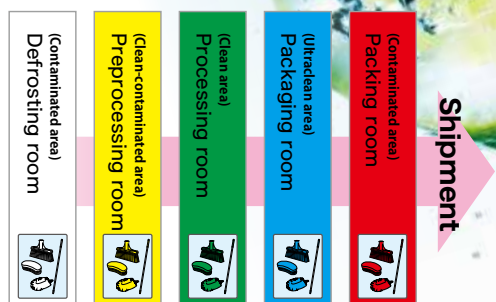

5 Uses special triangle pole-shaped fibers

Our original bristles are made of special fibers which have a triangular cross-section. They enable the differentiation of our products from other brushes, simplify the follow-up investigation in the event of foreign matter contamination, and enhance traceability.

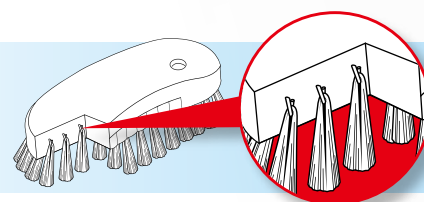

6 Customized and special-order products can be made

We can make customized and special-order pipe brushes in response to requests from customers (Refer to page 32 for details).

HACCP-compliant model plant (Example)

※ The cleaning tools are made in five different colors to distinguish the point of use, application and storage area of cleaning tools, as required by HACCP to support safety management work.

The products made with this special fiber have the following mark:

Examples of customized products

■ Custom-made pipe brushes

■ Handy brushes with cut bristles

■ Brushes with bristles implanted on a resin plate

Metal detector-compatible brushes

HPM series

The features of HPM-series brushes

- 1 Bristles dyed in colors which can be detected by metal detectors are used
- 2 Highly-durable bristles are used
- 3 Four color variations enable color-coding
- 4 Secure and safe Japanese-made brushes
- 5 Designed for Japanese people's physical constitution
- 6 Structured to prevent bristles from falling out

Notes

- ※ There are cases where the bristles cannot be detected, depending on the settings of the metal detector used, physical properties of foods and etc. Please check under actual usage conditions in advance.
- ※ Bristle samples for testing are available. Please feel free to contact us.
- ※ When using a bristle sample, please set the detection sensitivity of the metal detector at the level which reacts to the bristle sample before monitoring, if possible. Please also check if the setting affects your regular operations.
- ※ The fibers of metal detector-compatible brushes are not triangular in cross section.

HPM-series

Bristles dyed in colors which can be detected by metal detectors are used

For appliance cleaning

HPM L Magnetic Handy Brush

Product code

Red	57042
Yellow	57043
Green	57044
Blue	57045

Specification

Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	190 x 50 x 50
Bristle length (mm)	30
Upper-temperature limit	120°C
Weight	165g
Material	Main body/ Polypropylene Bristle/Polyester

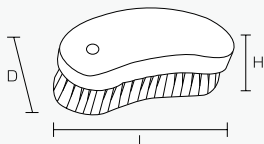

Usage example

The easy-to-grasp grip accurately transmits the stress applied to remove stains as well as reduces the burden on the body.

For appliance cleaning

HPM S Magnetic Handy Brush

Product code

Red	57032
Yellow	57033
Green	57034
Blue	57035

Specification

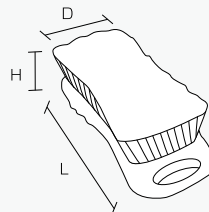

Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	120 x 45 x 40
Bristle length (mm)	20
Upper-temperature limit	120°C
Weight	110g
Material	Main body/ Polypropylene Bristle/Polyester

Usage example

For appliance cleaning

HPM M Magnetic Handy Brush

Product code

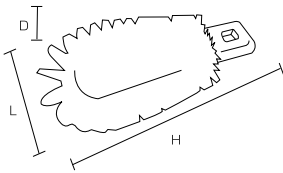

Red	57177
Yellow	57178
Green	57179
Blue	57180

Specification

Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	170 x 55 x 45
Bristle length (mm)	30
Weight	135g
Material	Main body/ Polypropylene Bristle/Polyester

For appliance cleaning

HPM Magnetic Scrubber

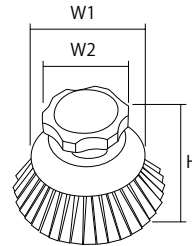

Product code	
Red	57162
Yellow	57163
Green	57164
Blue	57165

Specification	
Bristle diameter (mm)	0.6
External dimensions (L x D x H)	70 x 40 x 180
Upper-temperature limit	120°C
Weight	70g
Material	Main body/ Polypropylene Core wire/ Stainless steel Bristle/Polyester

For appliance cleaning

HPM Round Magnetic Handy Brush

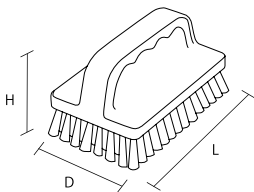

Product code	
Red	57072
Yellow	57073
Green	57074
Blue	57075

Specification	
Bristle diameter (mm)	0.6
External dimensions (mm) (W1 x W2 x H)	90 x 70 x 90 (φ 110)
Bristle length (mm)	45
Upper-temperature limit	120°C
Weight	235g
Material	Main body/ Polypropylene Bristle/Polyester

For appliance cleaning

HPM Magnetic Square Handy Brush

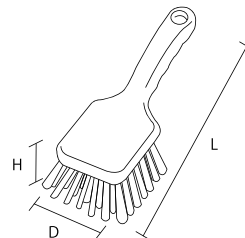

Product code	
Red	57077
Yellow	57078
Green	57079
Blue	57080

Specification	
Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	150 x 100 x 90
Bristle length (mm)	30
Upper-temperature limit	120°C
Weight	250g
Material	Main body/ Polypropylene Bristle/Polyester

For appliance cleaning

HPM Magnetic Short Handled Brush

Product code	
Red	57082
Yellow	57083
Green	57084
Blue	57085

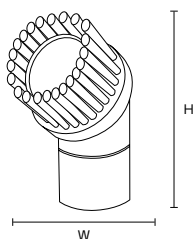

Specification	
Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	215 x 75 x 55
Bristle length (mm)	33
Upper-temperature limit	120°C
Weight	225g
Material	Main body/ Polypropylene Bristle/Polyester

Usage example

For appliance cleaning

HPM Vacuum Cleaner Nozzle Magnetic Brush ● ● ● ●

Product code

Red	57172
Yellow	57173
Green	57174
Blue	57175

Specification

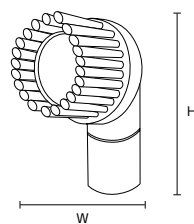

Bristle diameter (mm)	0.6
External dimensions (mm) (W × H)	70 × 145 Nozzle body insertion diameter Inner diameter 45 mm Outer diameter 49 mm
Bristle length (mm)	40
Weight	75g
Material	Main body/ Polypropylene Bristle/Polyester

Usage example

For appliance cleaning

HPM Vacuum Cleaner Nozzle Magnetic Slim Brush ● ● ● ●

Product code

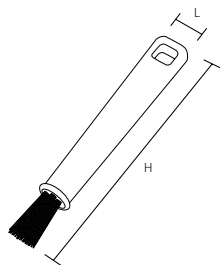

Red	57182
Yellow	57183
Green	57184
Blue	57185

Specification

Bristle diameter (mm)	0.6
External dimensions (mm) (W × H)	70 × 110 × 100 Nozzle body insertion diameter Inner diameter 28 mm Outer diameter 33 mm
Bristle length (mm)	40
Weight	65g
Material	Main body/ Polypropylene Bristle/Polyester

For appliance cleaning

HPM Magnetic Pen Brush ● ● ● ●

Product code

Red	57107
Yellow	57108
Green	57109
Blue	57110

Specification

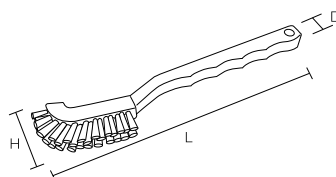

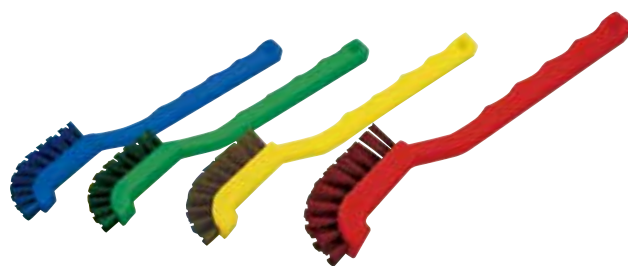

Bristle diameter (mm)	0.6
External dimensions (mm) (L × H)	22 × 155
Bristle length (mm)	30
Upper-temperature limit	120°C
Weight	30g
Material	Main body/ABS Bristle/Polyester

Usage example

For appliance cleaning

HPM Magnetic Utility Brush ● ● ● ●

Product code

Red	57102
Yellow	57103
Green	57104
Blue	57105

Specification

Bristle diameter (mm)	0.6
External dimensions (mm) (L × D × H)	210 × 13 × 40
Bristle length (mm)	15
Upper-temperature limit	120°C
Weight	20g
Material	Main body/ Polypropylene Bristle/Polyester

For appliance cleaning

HPM Magnetic Dish Brush Mini

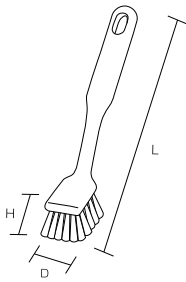

Product code

Red	57007
Yellow	57008
Green	57009
Blue	57010

Specification

Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	200 x 30 x 33
Bristle length (mm)	22
Upper-temperature limit	120°C
Weight	50 g
Material	Main body/Polypropylene Bristle/Polyester

※ The specifications of this product are subject to minor changes.

For appliance cleaning

HPM Magnetic Slim Dish Brush

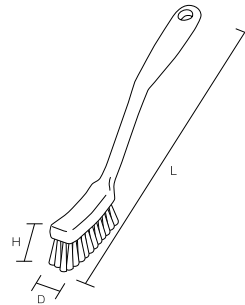

Product code

Red	57012
Yellow	57013
Green	57014
Blue	57015

Specification

Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	290 x 22 x 45
Bristle length (mm)	25
Upper-temperature limit	120°C
Weight	60g
Material	Main body/ Polypropylene Bristle/Polyester

For appliance cleaning

HPM Magnetic Wide Dish Brush

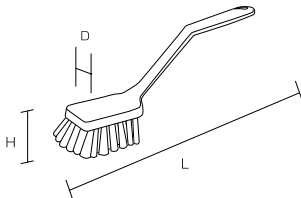

Product code

Red	57022
Yellow	57023
Green	57024
Blue	57025

Specification

Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	290 x 45 x 40
Bristle length (mm)	20
Upper-temperature limit	120°C
Weight	85g
Material	Main body/ Polypropylene Bristle/Polyester

Usage example

For appliance cleaning

HPM Straight Handle Magnetic Brush

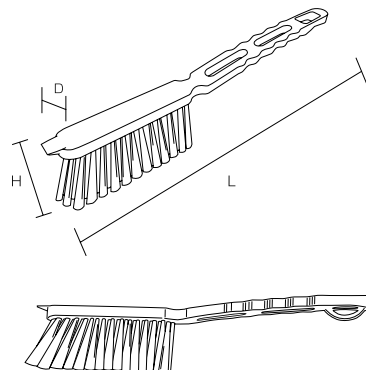

Product code

Red	57252
Yellow	57253
Green	57254
Blue	57255

Specification

Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	410 x 35 x 97
Bristle length	62
Upper-temperature limit	120°C
Weight	195g
Material	Main body/ Polypropylene Bristle/Polyester

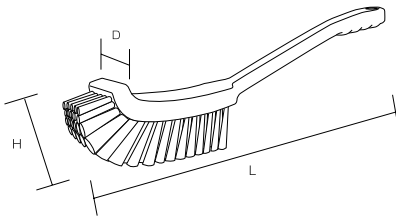

For appliance cleaning

HPM Magnetic Long Handled Brush

Product code	
Red	57002
Yellow	57003
Green	57004
Blue	57005

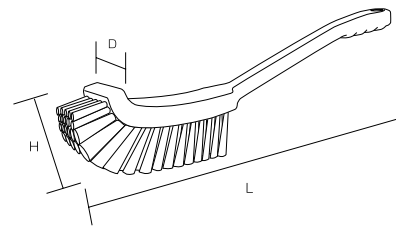

Specification	
Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	435 x 45 x 70
Bristle length (mm)	40
Upper-temperature limit	120°C
Weight	250g
Material	Main body/ Polypropylene Bristle/Polyester

For appliance cleaning

HPM Magnetic Carwash Brush

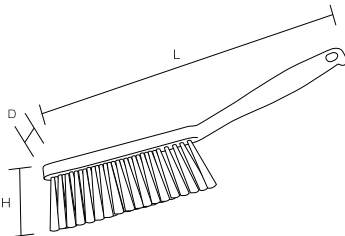

Product code	
Red	57167
Yellow	57168
Green	57169
Blue	57170

Specification	
Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	460 x 45 x 100
Bristle length (mm)	53
Upper-temperature limit	120°C
Weight	280g
Material	Main body/ Polypropylene Bristle/Polyester

For appliance cleaning

HPM Magnetic Bakery Brush

Product code	
Red	57052
Yellow	57053
Green	57054
Blue	57055

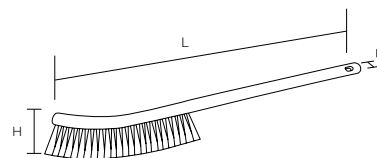

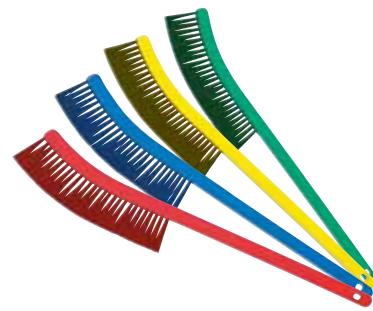

Specification	
Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	350 x 35 x 110
Bristle length (mm)	50
Upper-temperature limit	120°C
Weight	180g
Material	Main body/ Polypropylene Bristle/Polyester

Usage example

For appliance cleaning

HPM Magnetic Wand Brush

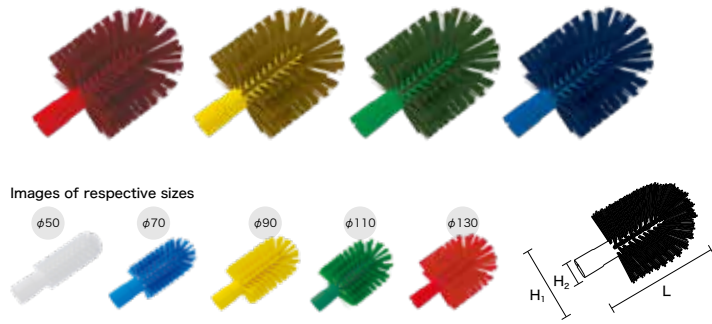

Product code	
Red	57092
Yellow	57093
Green	57094
Blue	57095

Specification	
Bristle diameter (mm)	0.6
External dimensions (mm) (L x D x H)	600 x 12 x 80
Bristle length (mm)	55
Upper-temperature limit	120°C
Weight	160g
Material	Main body/ Polypropylene Bristle/Polyester

Large Stainless-Steel Tray for HP Shoe Sole Cleaning Brush (accommodates two connected pieces)	54507

Specification

	Small Stainless-Steel Tray for HP Shoe Sole Cleaning Brush	Large Stainless-Steel Tray for HP Shoe Sole Cleaning Brush
External dimensions (mm) (LxDxH)	350 x 250 x 20	460 x 340 x 22
Weight	490g	1,130g

※ he set includes two anti-slip tapes.
(Please confirm and apply the most appropriate anti-slip method at your own discretion.)

Compactly sized to fit in narrow spaces! Connectable to increase the size!

Before Cleaning

After Cleaning

Usage example

This brush can easily scrape off residue clogged in shoe sole treads.
※ Using the product with both feet placed on it helps reduce slipping.
(Please exercise caution during use to prevent falls.)

NEW

For appliance cleaning

HP Mesh Panel / Hook

Recommended for fixed-quantity and fixed-location management !

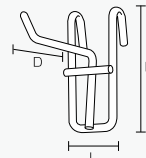

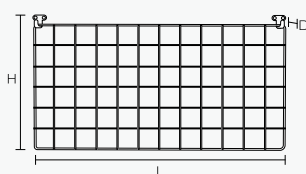

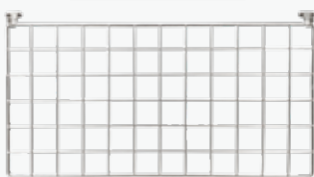

A mesh panel that allows hygienic storage of cleaning brushes. After washing, it is best to store the brush with the bristles facing away from the wall to improve ventilation and allow thorough drying.

The dedicated hook is designed to protrude forward, making it suitable for hanging long-handled tools.

(Please note that this product is manufactured in China.)

HP Mesh Panel

HP Mesh Hook

For appliance cleaning

HP Utility Brush ○●●●●

Usage example

These brushes remove stains even in inaccessible by hand, narrow and difficult-to-wash spaces, as well as sweeping up the dirt accumulated in the corners of machines. As these brushes are available in two types, Medium and Hard, you can select either one depending on the dust type. Their special toothbrush-shaped design enables reaching to the ends, making them suitable for various applications.

Weight	375g
Material	Main body/ Polypropylene Handle/Aluminum Rubber part on the edge/Elastomer

For floor cleaning

HP Aluminum Handle

For Deck Brush Heads, Broom Heads, Integrated Squeegee, Draining Dryer Heads, and Bottle Brush Heads

Joint connection Usage example

The HP Aluminum handle can be shared among deck brushes, brooms, draining dryers and bottle brushes. As this handle is interchangeable, it is more economical than the handles integrated with a broom. Our long years of experience are summed up in the easy-to-grasp design and reasonable length which puts less burden on the body.

Specification	
Bristle diameter (mm)	0.5
External dimensions (mm) (L x D1 x D2 x H)	215 x 5 x 16 x 20
Bristle length (mm)	13
Upper-temperature limit	200°C
Weight	55g

Brush replacement guideline ~ Have you been using such brushes for a long time ? ~

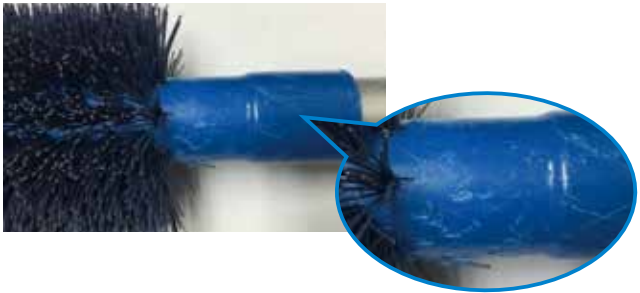

【Guideline for when to replace a brush】

- 1 When the bristles are worn or deteriorated, causing fraying, spreading, and/or splitting at the tips, and the length of the bristles becomes uneven.
- 2 When the bristles get caught on something during brush use and break off.
- 3 When damage or deformation, such as cracking or chipping, occurs on the brush or handle while the brush hits something or an excessive load is applied to it during use.
- 4 When the colors of the bristles or the body of the brush fade and become different from the original color.

In addition to the above, conditions like those shown in the diagram on the right can also be **major causes** of **foreign material contamination**. Please replace the brush as soon as possible when the above conditions are found.

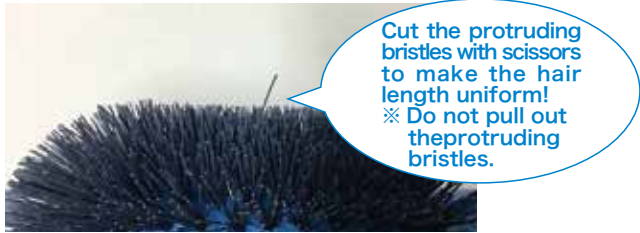

The following conditions may also be **major causes** of **foreign material contamination**. Please replace the brush as soon as possible.

When the body has scratches.

Dirt and bacteria can easily adhere to the scratched surface.

When the bristle ends pop out

Bristles may fall out easily. Continued use in such a condition increases the risk of foreign material contamination.

When the body has scratches.

Damaged parts may easily be mixed in as foreign materials. Dirt and bacteria can easily adhere to the scratches. Please replace the brush!

When the bristle ends pop out

The tips of the bristles are worn, and the length of the bristles is uneven. Bending and breakage are more likely to occur.

Scrubbing brush

Deformed state

Cleaning capability has been reduced because of deterioration.

Bristles falling out

Bristle ends pop out

! Bristles are more likely to fall out and may contaminate products as foreign matter.

Pipe cleaner

Deformation reduces cleaning power and makes the bristles fall out more easily. If you see deformation or bristles pop out, replace the brush immediately!

Squeeze rubber

The rubber is worn and easily torn off. Such rubber has reduced squeezing capability, and torn pieces of rubber may contaminate the product.

※ **Periodic replacement is recommended!**
 ※ Brush replacement intervals vary depending on the usage conditions, frequency, environment, and detergents used with the brush.
 We recommend that you review the above information and set your own replacement schedule.

■ Custom ordering is made possible because of domestic production.

We ensure thorough quality control by procuring all parts within Japan and conducting all production processes inside Japan. We are also ready to respond immediately to requests for custom-made products.

Q A ready-made, regular brush user here. It cannot remove stubborn dirt easily.

A We can customize regular brush bristles to shorter lengths to make them resilient enough to remove stubborn dirt more efficiently.

Customized hand brush ~ Super hard ~

Standard bristle length

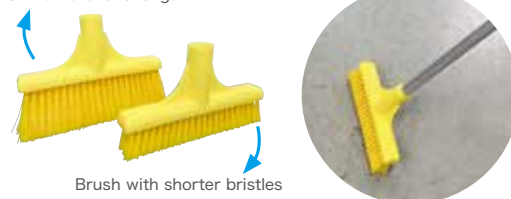

Brush with shorter bristles

The bristles of the regular HP Hand Brush L are made shorter and stiffer. This super hard type is ideal for stubborn stains.

Actually used at the following Bread factories and fish paste factories

Customized broom ~ For cleaning stubborn floor stains ~

Standard bristle length

Brush with shorter bristles

The bristles of the regular HP Broom are made shorter and stiffer. Ideal for sweeping residue stuck to floor surfaces.

Actually used at the following Frozen food factories

Laser engraving

We can laser-engage your cleaning equipment with its usage location, usage start date, or the like to support your sanitation efforts.

Actually used at the following

Western-style confectionery factories / Seafood processing plants

Custom heat-resistant brush

Upgrade from regular to heat-resistant bristles available!

Actually used at the following Japanese confectionery factories

Q We want to streamline our cleaning routines as much as possible in terms of both time and manpower. Is there any good way?

A We can custom-make dedicated cleaning tools attachable to machinery. These tools can significantly improve your cleaning efficiency.

Brush with bristles planted on plate resin

This brush can be attached to the machine!

Actually used at the following

Western-style confectionery factories / Rice cooking plants

Brushes for conveyor belts

This brush can be attached to the machine!

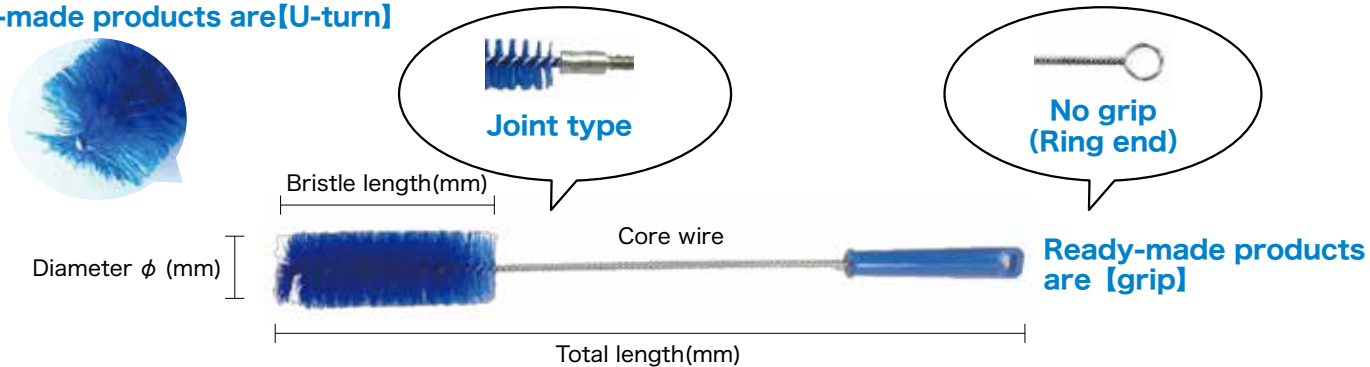

Example : 930 mm (W)
x 70 mm (H)

Actually used at the following Japanese confectionery factories

■ Customization is available to meet your demands!

- Bristle length (mm)
- Bristle thickness (stiffness) [0.2, 0.4, 0.6 mm]
- Brush color (white, red, yellow, green, blue, orange, purple, pink)
- Use of special bristle materials [magnetic bristle, heat-resistant bristle, ultra-thick bristle]

Ready-made products are [U-turn]

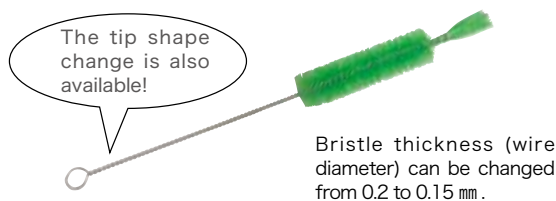

Q We want to clean the entire piping thoroughly, deep into hard-to-reach areas every time. How could we do that?

A By adding extension bristles to the tip of the pipe brush, you can clean deep into hard-to-reach areas.

Q We are annoyed that water splashes on us when cleaning the piping.

A Pipe brush bristles with a smaller root diameter will reduce water splashes. Using pipe brushes with such bristles, you can avoid getting water splashes all over the place.

Soft pipe brush with head bundle

Bristle thickness (wire diameter) can be changed from 0.2 to 0.15 mm.

This brush is designed with extra-thin, soft bristles to prevent damage to piping and tubing.

Actually used at the following Cosmetics plants

Customizing pipe brush ~ Water splash prevention ~

Red and black pipe brushes have different bristle stiffness. The black bristles are soft bristles designed to prevent water splashing.

Actually used at the following Ice cream factories

Q We want custom-made pipe brushes with a larger diameter than available with ready-made, regular ones. Can we order them?

A We can custom-make pipe brushes with diameters up to 200 mm. We tailor brushes to your desired size.

Q We want custom-made, handled scrubbing brushes. Can we order them?

A We offer custom-made handled scrubbing brushes tailored to your specifications.

Large-diameter pipe brush

Pipe brushes tailored to match piping diameter for improved efficiency!

Actually used at the following Bread production plants / Liquid egg plants

Handled scrubbing brush

This product is a handled version of HP Scrubbing Brush for a wider range of cleaning applications.

Actually used at the following Pharmaceutical plants

※ The minimum lot size for the special-order product is ten. ※ Please contact us if you want less than ten brushes.

※ Please note that it may take some time to create special-order products.

※ We also welcome other types of orders and consultations. So please feel free to contact us.

※ A separate quotation will be created for special-order products.
